IMPACT AND BENEFITS

Vegetal Conservation and Reforestation

- ❑ Strengthening of São Paulo's environmental and climate policy.
- ❑ Expansion of native vegetation cover and recovery of degraded areas.
- ❑ Generation of carbon credits and promotion of the green economy.
- ❑ Encouragement of research and environmental innovation in experimental stations.
- ❑ Target of 37,000 hectares restored by 2026 — the largest restoration effort in São Paulo's history.
- ❑ Direct contribution to climate change mitigation and biodiversity preservation.
