

**Youth rehabilitation program
(Fundação Casa Project)**

Youth Rehabilitation Program (Fundação Casa)

- Government of São Paulo initiative to modernize the management and infrastructure of Socio-Educational Care Centers for Adolescents (CASA).
- Objective: increase the efficiency in the use of public resources and improve the quality of services provided to young people.
- The proposal foresees that the private partner will assume the operation and maintenance of the units, while the State remains responsible for public policy and the supervision of socio-educational measures.
- The model under study aims to centralize support services and enhance existing infrastructure.
